Date: _____

Applicant's Signature: _____

Health & Medical Form

The Health & Medical Form is one of the documents required by the Korean Immigration Office to determine if an applicant qualifies for E2 visa status. The Medical Check includes a General Exam, an AIDS test, and a Drug Test via Blood Tests, Urine Tests, and Chest X-rays.

It is very important that this form be filled out truthfully as a medical exam taken within 90 days of your arrival in Korea will confirm your answers.

Answering "YES" to some of the questions may disqualify an applicant from being eligible for an E2 visa, as certain medical conditions can be a risk not only to the applicant but also to the school, which is responsible for their care and comfort.

If you think that you have to answer, "YES" to any of the questions, please discuss it with us first, prior to sending your documents to Korea. We will be able to review it with you and determine if you qualify for the E2 visa.

- ✓ A drug test is administered during the medical check in Korea, including testing for cannabis use (please note that depending on exposure, marijuana can stay in your system for a time ranging from 2 weeks to 3 months). Certain over-the-counter medications may result in a false-positive result on your medical exam, so it's important to let us know if you are taking any medications. A doctor's note and/or discontinuation of certain medicines may be required.
- ✓ Mental/Neurotic/Emotional Disorders can be particularly tricky as they can range in their severity. Please let us know if you have and/or are suffering from any types of disorders, including the severity, treatment, and duration.

If you have any questions or concerns, please let one of our team members know as early as possible.

Teach English in Korea [TEIK] will not reimburse applicants who fail their medical exam for any related costs incurred by coming to Korea, including flights, visa, and application expenses, etc.

Thank you.
